DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 and 27-28, drawn to a method of forming a peer-to-peer group, classified in class 709, subclass 204.
 - II. Claims 12-26, drawn to a method of discovering a peer-to-peer group, classified in class 709, subclass 217.
 - III. Claims 29-30, drawn to a method for synchronizing information between members of a group, classified in class 709, subclass 248.
 - IV. Claims 31-36, drawn to a method of managing shared group information in a peer-to-peer group, classified in class 707, subclass 104.1.
 - V. Claims 37-45, drawn to a method of maintaining a peer-to-peer group graph, classified in class 709, subclass 223.
 - VI. Claims 46-52, drawn to a method for dynamically reconfiguring a peer-to-peer group graph to enhance performance thereof, classified in class 709, subclass 221.
 - VII. Claim 53, drawn to a method of departing a peer-to-peer group, classified in class 709, subclass 237
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I, II, III, IV, V, VI and VII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention claims elements that are not

Art Unit: 2142

found in any of the other inventions, these elements having separate utility. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for each respective group would not be required for any of the other groups, restriction for examination purposes as indicated is proper.
